Academia

Alongside ResearchGate, Academia.edu is one of the best-known academic networks. After the free registration, it is possible to create your own profile, network with colleagues and share publications. In addition, you get statistics on view and citations of your own publications uploaded to the platform.

[Research](#)

Cogprints

Electronic archive of articles and research reports from the fields of psychology, linguistics, computer science, biology, philosophy, medicine, anthropology. The full texts are available electronically for free.

[Research](#)

CORE

CORE is a global aggregator of open-access scientific publications from international open-access journals and repositories. Currently, CORE indexes over 135 million documents.

[Research](#)

IDEAS

In IDEAS you will find both licensed and many freely available titles in open access (recognizable by the green download icon). If you enter your search terms in the search box and limit your search to "paper", the vast majority of hits should be available in open access.
